THRESHING COMMENCED TUESDAY

Geo. Neis created a record this season when he commenced threshing last Tuesday on his own place north of Mirror. He moved from there to the Lakebed district with a complete crew and at the present time is busy separating the grain for the farmers there. The yields so far have not been very high, the rains coming just a little too late to be of help.

J. C. Simpson starts out tomorrow (Friday) with his threshing outfit.

New Telephone Office

A new telephone office is being built on Lake Street, just east of the town hall. The building is 16x24 feet and one storey, and will have an exterior finish of cementstucco. Jas. Smalley, of Calgary, is erecting the building and is also doing the work. It is expected that it will be ready for occupancy by the end of next week.

Five New Phones

During the past week four new rural phones have been added to the Mirror exchange, as follows:

R 506, Fred McDonald ;
G 101, Mrs. Reid ;
702 H. M. Good ;
704, R. McDonald.

Mrs. Chas. Estell is also having a phone installed in the house in Mirror.

GERALD DISTRICT BUDGET

Mrs. O. L. Davidson visited with Mrs. Geo. Neis on Monday afternoon.

Misses Alice and Marion Brewster spent several days this week with Mr. and Mrs. H. C. Brewster at Lakebed.

Mrs. Verna Ferguson has returned to her home in Bashaw after spending a couple of weeks with her aunt, Mrs. R. N. Wiggins.

Philip Neis and Bert McLeod of Mirror, motored to Wetaskiwin last Monday.

Mr. and Mrs. O. Reid and son, Percy, of Alida, Sask., have returned to their home after spending a two months' vacation with Mrs. Reid's sister, Mrs. R. N. Wiggins. Mrs. Wiggins' father, Mr. Ferguson, is also a visitor at the Wiggins home, and expects to remain in the district for some time.

Mr. P. B. Crooks, Fonda, Otoe and Wayne left on Monday for Lawrence, Kansas, where they will make their future home. Before leaving, a number of friends gathered at the Crooks' home to bid them farewell and express regret at their departure from the district. Several pleasant evenings were also given at Bashaw for Fonda, who will enter the State University upon their arrival at Kansas.

Mr. and Mrs. Charlie Ray and son Kenneth, also Mr. and Mrs. Ed. Holben motored to Waterglen last week and visited with Mr. and Mrs. John Bolch. Kenneth is staying at Waterglen for a ten days' visit.

Miss Dorothy Dowswell, of Regina, Sask., is visiting her parents, Mr. and Mrs. Fred. Dowswell.

Miss Betty Minkler is returning to Edmonton this (Thursday) afternoon where she will attend school for the coming term.

LOCAL AND DISTRICT NEWS

Duck shooting.

Miss Watmough has returned from a week's holiday at Banff.

Mrs. N. G. Spiece and young son returned from Stettler on Sunday last.

Miss B. M. Pym, of Edmonton, is visiting her brothers at Emerson Ranch.

Mr. and Mrs. E. E. Estell took a motor trip to Calgary and Banff last week.

The Mirror school board will meet at the secretary's office on Saturday evening, September 2nd, at 7 o'clock.

Mrs. John Mackay and daughter Manlie, returned on Wednesday from a two months' holiday at the Coast.

Owing to next Monday being a holiday the village council will meet the following Monday evening, Sept. 11th.

Mr. and Mrs. J. F. Baugh, of Acme, Alta., have taken up their residence in the Suggott house. Mr. Baugh is the new principal.

Next Monday is Labor Day and a public holiday. The telephone office and post office will be open during the usual holiday hours.

Mr. and Mrs. T. A. Hornbrook, of Calgary, accompanied by Gwen and Jack, were visitors in Mirror last Thursday at the home of Mrs. G. K. Tilley.

Mrs. G. K. Tilley, who tried examinations recently has received a Fellowship in the Canadian Institute of Secretaries, which will entitle her to the initials F.C.S.

FOUND.—On Wednesday, Aug. 30th, in Mirror, a gold wedding ring. Owner can have same by paying for this ad. and proving property. Apply to Mrs. E. Webster.

The Merry Maiden's Club will open their fall session on Tuesday, September 7th. The meeting will be in the form of a social. All teen age girls invited. NETTA OLDRIDGE, Secy.

Thos. Stranatka has re-leased the Grand theatre for a year, and commencing on Saturday, Sept. 9th, will give a picture show every Saturday evening. Some of the best pictures now on the road will be shown here.

The many friends of J. M. Wright will be pleased to learn that he has successfully undergone an operation at Rochester, Minn., and the cancer removed from his cheek measuring over two inches in diameter. He is doing nicely at last writing.—Bashaw Star.

The Mirror school opened on Monday last and about 100 pupils are in attendance. J. F. Baugh is the principal and has charge of the third room, with Miss K. Ennis, a former teacher, and Miss Gertrude Pancratz teaching in the intermediate and primary rooms respectively.

On Friday evening, the 1st of September, a social evening will be given in the Union Church by the pastor and his wife, on behalf of the boys and girls of Merry Maidens, Taxis and Rangers clubs. The parents also of the boys and girls are particularly requested to be present. There will be a program of music and games followed by refreshments.

Don't Squeeze

The failure to organize a Wheat Board to assume full charge of the marketing of this season's grain crop in Western Canada leaves the situation this year much the same as it was a year ago with a slump in prices at the place as soon as the grain begins to move. The result is that in many cases the profit is so great as to completely wipe out, in thousands of instances, the farmers' profit and to bring the selling price actually below the cost of production. Notwithstanding a fairly good yield in many parts of the West last year farmers sustained financial losses.

Now there is \$162 wheat crop about to be marketed, and with the best crop since the banner year of 1915 to be sold, it is of the utmost importance that this huge volume of wheat should not be forced on to the market at once, the inevitable result of which would be to cause a "break" in prices that would be disastrous and spirit-crushing.

But there is also a Wheat Board available to check and control the marketing of grain in terms of interests of individual farmers. These farmers have contracted debts they must pay and are anxious to pay. The Fall and early Winter months, following the harvest, is the period for the liquidation of liabilities. Banks, mortgage companies, implement companies, merchants, and individuals expect and call on the farmer to "pay up" at this time and often at amounts far in excess of what he can afford. The wholesaler and jobber who has extended credit to merchants on the strength of the credit the merchant has given to farmers makes demand for his money, thus leaving the merchant no option but to press the farmer. And the wholesaler is forced to do this, because the manufacturer is calling upon him to do the same. This is the reason why the farmer is compelled to seek advanced large loans to enable him to keep his factory busy and his men employed during this season, when little ready money was coming in. The banks, too, have made advances not only to the manufacturers, but all down the line to wholesalers, jobbers, merchants and farmers, and have financed more and other advances during the period when they could not collect even interest in cases of payment prior to maturity.

Everybody will recognize, of course, that the banks cannot go on indefinitely advancing money on loans unless such loans are repaid and periodically there is a general liquidation of outstanding liabilities. Only so can banks remain healthy, the interests of depositors be safeguarded, and the financial stability of the country maintained.

While fully realizing these things there is a factor in the present situation that must be taken into account if irreparable loss is not to be inflicted, not on the farmer alone, but upon every national interest, the banks and other large financial institutions not excepted.

To meet the emergency we should have a debt reducing crop. Rightly handled it will accomplish such purpose in large measure. The fact must be appreciated, however, that one good crop will not efface the liabilities incurred during four or five years of poor crops or no crops at all. And if the pressure to secure collection of debts in all quarters is so great as to compel farmers to sell their grain at rates as low as it is threatened, the market will so glutted that prices will fall below a point where it is not in the farmer's interest to sell.

If the farmer derives no profit from his year's labor, and but barely succeeds in covering the costs of production, there will be nothing whatever to reduce the present burden of debt.

If because of shorttimedness in attempts at debt collection wheat is forced to be marketed before the time when it is most needed, and the break in prices results, the farmers' profits will disappear and with the disappearance of those profits his ability to pay debts. Failure on the part of the farmer to pay will result immediately on merchant, wholesaler, manufacturer and bank, and ultimately on the nation as a whole.

Therefore, it is essential that at the earliest possible time every effort should be made, and every device provided, to render unnecessary the damping of the crop on the market immediately following threshing. It is as much in the interest of the Eastern manufacturer and financier as it is in the interest of the Western farmer that wheat prices be maintained. It is likewise in the interest of the grain farmer that his crop be marketed at the earliest possible time in the hope of getting a fair price. The farmer's own efforts in a small lowering in the price of bread, but a few cents less for bread would not compensate for loss of employment due to a slowing up or shutting down of industrial plants and other works caused by financial stringency.

On the other hand, the government, in its capacity as a creditor, has a right to insist that the farmer will contribute the latter to pay a portion of his accumulated debts and thus ease the financial situation all along the line and operate to restore confidence and re-establish credit.

The Modern Slave

Human Labor is Rapidly Giving Place to Machinery

To make 100 pairs of women's shoes by hand takes 1,025 hours of labor. To make them by machine requires only 30 hours. A machine-driven sewing machine can be worked in 272 hours as can be saved out by hand in 16,000 hours. We are headed for a day when the only human labor will be making machines and then getting rid of them. The machine is the modern slave. In effect, each of us has many of these slaves working for us. That is why we have a higher standard of living than our ancestors.—Minneapolis News.

Two auto tires make an excellent sling for lifting barrels.

Ancient Masterpiece Sold

Carving of Head of Egyptian King Brings \$50,000

What is described as "the finest expression of Egyptian statuary art in the world" has been sold. Sobek's auction for \$50,000. It is the head of the Pharaoh Amenophis III, an Egyptian king who lived about B.C. 300. It is cut in obelisk, which is said to be one of the hardest stones on which an artist can work.

Mt. Everest Named After Englishman

British Official Was Head of Survey Department in India

It is surprising to learn that the man who was named after the highest mountain in the world lived so recently that his son is still alive.

One is apt to think of names of places as being of immemorial antiquity. But in 1856, in 1858

or that moment received its name, it was called after a British official in India who afterwards became Sir George Everest. It was called in Tibetan, the language of the district in which it lies, Jomo-Kang-Kar, or Chomo-lung-ma, which one knew nothing of.

Sir George Everest was head of the Indian survey, a department concerned with the measurement of the earth. He was so deeply interested in his work that, when he was once on a holiday at the Cape, he examined into the survey of that colony as it was then, and discovered mistakes which made it necessary to make a fresh survey.

Asticore Yaks at Wainwright

A number of Asticore yaks have been added to the animal herd at the National Park at Wainwright, Alberta. It is expected they will be crossed with the buffalo and produce a useful hybrid, an experiment that will be watched with interest by zoologists.

Natural History

"I am told you went in for speculation on the Stock Exchange lately," said one tradesman to another. "Were you a bull or a bear?"

"Neither. I was an ass!" replied the other.

Letting Him Know

"Would you like to take a nice long walk and get ashore?"

"Why, I'd love to," replied the young man caller joyously.

"Well, don't let me detain you," he said sweetly.

ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all.

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists, the trade mark is registered in Canada of Bayer Manufacture of Montréal, Quebec, Canada. Manufactured by the Bayer Company, the Bayer Company, to satisfy the public against imitations. The Bayer Company will be pleased with their general trade marks, the "Bayer Signs."

The Problem Of The Mentally Defective

Grave Social Menace That is Not Properly Understood

The mentally defective constitute by far the largest, one of the greatest and most perplexing of social problems. This fact is all too little understood and appreciated.

It is usually estimated that from 1½ to 2 per cent of the population are below par mentally. On that basis there are in Canada from 125,000 to 180,000 of these unfortunate. Some are idiots, utterly helpless and unable to care for themselves. Others are feeble-minded, brighter than idiots but unable to support themselves, and requiring constant oversight and protection.

Between the imbecile and the normal are the much larger proportion of the feeble-minded, who are not easily detected constitute the greater menace. After they reach adult years they remain mere children in mentality and self-control, yet possess knowledge, memory, judgment, propension and desires of adults.

It is easy to see what a menace this combination constitutes, to themselves and to the community.

The sexual problems are unfortunately similar, and they pose neither physical nor moral difficulties in forcing the consequences of indulgence, nor moral self-control to govern their passions. They multiply twice as fast as the normal folk,

and they also reproduce themselves and die regardless of whether they are married or not.

In the Board of Education Offices in Vancouver is a family chart showing that some 100,000 of the 1,000,000 men and women are feeble-minded women. Twelve children were born. Three fortunately died young. The nine who grew up are all feeble-minded. One of them, a girl, is now not in her teens. She is the illegitimate mother of five children all feeble-minded. Fourteen mental defectives, each one a social problem, from one marriage that never should have been allowed.

It is difficult to estimate the total number of feeble-minded, but to judge that two-thirds of all prostitution is due to feeble-mindedness. Moreover, a large proportion of the children born out of marriage have parents who are feeble-minded. Those living in promiscuous sexual indulgence soon develop venereal diseases and infect all their male associates. Many of these associates are normal young men who afterwards marry and infect their wives and daughters with venereal diseases and pass on the dread heritage of these terrible diseases to their children.

It is estimated that not more than 10 per cent of venereal diseases come from this cause.

At least fifty per cent of all crimes in general are committed by these unfortunate.

Their uncontrollable passions, their avaricious, common or debased, to inebriety, gambling, burglary, to banditry, to robbery, to rape, to murder, to arson, to the commission of child-murders.

Many of the epidemics of vice in schools, hospitals, prisons, etc., are caused by feeble-minded girls or boys.

Normal children, especially boys, are by them led into vice, and the evil rapidly spreads. Misery is thus done that will disgrace these youths for years to come.

It is false economy not to provide for the care, training or restraint of these defectives. A large part of the enormous cost of administration of these institutions, convalescent homes, etc., could be saved if adequate provisioral were made for their segregation, specialized training and prevention of the reproduction of these defectives.

Setting forth these facts the Canadian Forestry Association reminds the public that when they buy timber, especially poplar, they help to supply a report received from the Dominion Forestry Nursery at Indian Head, Sask. On a patch of soil measuring a little over one acre, a single tree dropped and grown has been grown in eight years from Russian poplar cuttings. The plantation averaged a little over two cords per acre per annum, which valued at \$8 per cord could give a revenue of \$16 per acre every year the trees were left growing.

Prairie Tree Planting Is Declared to Be Profitable

A Wonderful Yukon Valley

Hott Springs Produce Tropical Growth Amidst Winter Surroundings

Judging from the report brought back by Mr. Frank Perry, mining engineer of Vancouver, who recently returned from a year's trip in the Yukon region, plenty of scope yet exists for the energy of explorers and discoverers. The area of the terrace he examined was roughly speaking, in the north was roughly speaking, that between the Coastal Range and the Lizard and Fort Nelson Rivers, measuring about 700 miles north and south and 100 miles east to west. At one point in his journey during the winter season his attention was attracted to a heavy fog that hung over what appeared to be a valley. This unique phenomenon induced him to return and stop at a later date for the purpose of further exploration. Sure enough, he struck an almost tropical valley, about 200 miles long and 40 miles wide throughout, the floor of which was dotted with hundreds of hot springs that bubbled out of the ground in all directions. The steam rising from the water, hot almost to boiling point, naturally condenses and falls in drops, forming the fog. Mr. Perry had first seen from the crest of the range. According to his account, many wild animals congealed in this remarkable valley, and there were several thousand possible in the heat. Hundreds of mountain sheep and goats, caribou, moose, bears and other four-legged quadrupeds were observed, the moose, almost square from fat, being the most abundant animal, and them and almost touched them. The Indians, he reported, though aware that this valley was a hunter's paradise, never ventured within its borders.

The Indians said that periodic monsoons ruined its resources. Equally interesting in his statement that he had made important discoveries of mineral deposits, including gold, silver, copper, tin, zinc, lead, and iron, and evidence of coal, oil and iron formations. Because of this, Mr. Perry was not diverted the exact location of this wonderful valley, whose trees grow to a height of 100 feet, and normal. He tells of ordinary wild rose bushes that resembled trees, stems as thick as a man's forearm, and so dense that it was impossible to walk through them. *Willows*, *birches*, *green trees*, *size*, making it possible to travel among the trunks of the shrubs, like a jungle, a foot or two in diameter. Vines grow to a length of about six feet, while needles and ferns were also of unusual height. Birch trees, Mr. Perry declared, attained a height of 700 feet, for some peculiar reason being more numerous in the northern ground. All grasses and shrubs, common to the north, he found to be of unusual size. Although a year's travelling was necessary to enable the average tourist to visit the place, Mr. Perry is planning to return to the happy valley by airplane that will only take a few days to make the journey. All this may sound weird and fantastic in a measure, but there is nothing fantastical about the existence of hot springs in the Yukon district.

The ever more wonderful valley of fire in Alaska might easily be duplicated on approximately in the neighbor hood. The author of the article can not prevent an inclination to skeptical attitude regarding Mr. Perry's somewhat astonishing narrative. But whether or not he has employed poetic license in his description of the valley he described, there can be no doubt that an infinity of interesting discoveries still awaits explorers in the unknown parts of Canada's vast Northwest Territories.

Very recently, however, he has turned to yet another concerning by far the larger part of that immense area yet unbroken by the feet or white men. In the near future recourse will certainly be had to the alpenstocks, independent as it is of all the other factors that prove so difficult to overcome by the traveler who is confined to terra firma.—*St. Thomas Times-Journal*.

Growth of Dominion's Capital City

Ottawa city has a population of 150,195, according to the latest figures of the 1922 city directory. The population of the suburbs is estimated at 35,000. The Canadian capital covers 5,290 and one-quarter acres, and has been bounded by the city limits set by the Government, which was assessed at nearly \$132,000,000. In 1910 the taxable assessment was only \$24,178,000, and the population 58,195.

Clerk.—Yes, sir. Zythum—Yale Record.

Greenland was discovered and named, about the end of the 19th century by a Norwegian, who established a colony there.

Recently Introduced Wheats Have Revolutionized Wheat Growing In Western Canada

Everyone knows of Marquis wheat, although few persons know its origin or achievements. Marquis wheat was developed in 1910 by the wheat division of the experimental farms branch of the Dominion Department of Agriculture. It was first given to the grain growers of the Canadian west in 1910 through the channels of the grain in free distribution. In 1917 about 250 million bushels of Marquis wheat were grown in the Northwest.

In Canada this represented by

the replacement of other varieties

a gain in the national wealth of about

15 millions of bushels which at \$2 per bushel means \$30 million or dollars.

Marquis wheat is a new com-

er and the gain that the western states was 20 millions of dollars.

With reference to Marquis wheat, let me quote one or two paragraphs from Dr. Ernest G. H. Dickey, Director of the Experimental Farms Branch of the Dominion Department of Agriculture:

"Of the common wheats, Marquis is distinctly superior to all other commercial varieties, for the eastern and southern sections of the country."

He adds:

"There is no indication at present that any of the newer varieties, Prelie, Pioneer, Kitchener, Baby and Red Bob, can replace Mar-

quis in North America."

The wheats mentioned above were all produced in Canada to suit certain Canadian conditions just as Marquis was. But the same conclusion can have been reached only by a knowledge of the country, most of whom will replace Marquis in the Marquis areas.

Three of these varieties were originated by the cereal division of the experimental farms branch of the department.

Pioneer, Baby and Red Bob, which were earlier than Marquis have their place in Canadian agriculture in districts where the season is too short for the maturing varieties.

To this list of wheats, Marquis, which ripens a little earlier than Marquis, but should only be grown in districts that are not subject to wheat blight, was added.

Mr. Dickey, Director of the Experi-

mental Farms, British Columbia, Dr. Dickey, Undoubtedly are of use, but their

usefulness is limited; these wheats were originated by Dr. Steers Wheeler, of Rosedale, Sask.

Wheating wheat in West

Canada, length of maturity is a very important feature.

Marquis Red Flax and Kitchener ripen at about

the same time as Marquis.

Red Flax, Prelie and Preude, about 6 days before Marquis. Pioneer, being awed, is not recommended for growing the potato.

It can therefore be said that the recently introduced wheats in the Canadian west have revolutionized wheat growing in Canada and the northwestern states during the last half century.—P. Russell Cowan, Dominion Cerealist.

Agricultural Research In Great Britain

**Over Eighteen Years Spent
Valuable Work Was Started**

It is not generally known that Great Britain possesses the oldest agricultural research institution in the world. Over eighty years ago a number of British agriculturists set aside a sum of money to establish a fund for the promotion of research in the growing of wheat and other crops.

The work was carried through its early stages by the industry and enthusiasm of private individuals, and there was so much interest shown that it was recognized and aided by the state.

Many valuable results have been achieved, particularly with regard to the use of manures, the gases and treatments of the soil, and the control of various pests which trouble the farmer and often bring his labor to nought.

Recently the Royal Agricultural Society invited the co-operation

of landowners and farmers in

the work of research, and it has been worked out at this centre, and it is significant that more others of land and helpers have been recruited than can be entertained.

A New Mowing Machine Self-sharpening Knives Remove Grass Close to Ground

The standard type of machine for cutting grass consists of a rotary cutting cylinder provided with a stationary bottom blade.

This type of machine is by no means perfect, as it does not cut very close to the ground and is also ineffective on uneven ground.

A new type is now available.

The cutter of the machine consists essentially of two sickle blades, the sharp edges of which are in contact with each other.

The movement is such that the knives are practically self-sharpening, and the machine removes any kind of grass extremely close to the ground. Blades of this type can rapidly be attached to any mower, scythe, or reaper.

CANADA'S MISSIONARIES ABROAD

In 1915 three men, a lawyer of Iroquois, Ontario, and his friend, Martin, a brewer of the same place, have arrived in England having worked their passage across the Atlantic in a small boat. They are visiting the Old Country for the first time, and in order to obtain a knowledge of the country, which is a foreign land to them, England and Scotland are their intended itinerary. They state that they are Canadian visitors who will be pleased to answer any inquiries relating to the opportunity Canada offers to the British settler.

Sporting Duke Makes Hazardous Wager

Proposes to Cross Atlantic Alone on 17-ton Ketch

The Duke of Leinster who recently won a £2,000 wager as a result of a record-breaking trip in which he last expressed "full confidence" in the ability of his crew to bring him home.

He has undoubtedly are of use, but their

usefulness is limited; these wheats were originated by Dr. Steers Wheeler, of Rosedale, Sask.

Wheating wheat in West

Canada, length of maturity is a very important feature.

Marquis Red Flax and Kitchener ripen at about

One After Another Armenians Avenging Massacre of Countrymen After Long Interval

In 1915 Three Men Left Turkey

Ernest, Valery and Djemal. They brought Turkey into the war. They came to the conclusion, with the Germans standing by and consenting that the Armenian nation would have to be reduced to insignificance. They then proceeded to massacre and deportations which killed off a million Armenians or more. But they did not kill all the Armenians, and those who survived have not forgotten.

For protection purposes seaplane aeroplanes will observe the first few hundred miles of his voyage from the British Isles, and seaplane aircraft, the American, will be sent to him.

With the end of the war the Turkish tribunates had to go into exile.

All three were condemned to death.

They were executed in 1915.

A vendor which arises partly from the hostility of Turkish police officials, singly hanged him on a 12-ton ketch.

He will embark on this hazardous enterprise in the late summer.

He will be accompanied by a crew of three who will be responsible for the safety of the crew.

All three were condemned to death.

They were executed in 1915.

A vendor which arises partly from the hostility of Turkish police officials, singly hanged him on a 12-ton ketch.

He will embark on this hazardous enterprise in the late summer.

He will be accompanied by a crew of three who will be responsible for the safety of the crew.

With the end of the war the Turkish tribunates had to go into exile.

NEW CUSTOMS AND EXISE
SUB-OFFICE AT CAMROSE

Opening of a new customs and excise sub-office at Camrose has been authorized, according to word which Collector J. W. Sherwood has received from Ottawa. It is also announced that W. D. Hessey will be in charge of the branch office which will be opened at once and be operated under the Edmonton headquarters.

For some time representations have been made to Ottawa officials by persons who claimed that a sub-collector should be stationed at Camrose. The growth and volume of business at this centre fully justified the same service extended to Wainwright, Edson, Vermilion and other points it was urged, and evidently with ultimate success.

NINTH PROVINCIAL CROP REPORT ISSUED MONDAY

Harvesting of Alberta's crop is proceeding for the most part, under ideal weather conditions, although rain has interfered to a certain extent in some districts. Practically all of the rye has been cut and from 50 to 75 per cent. of the wheat. Harvesting of this crop will be completed by September 15th. A great deal of the oats is being cut for feed. Cutting of the second crop of alfalfa in the southern part of the province is practically completed and the yield has been fairly good.

Since the last report was issued by the department, heavy showers of rain have occurred in several districts, particularly in the central and northern areas. These rains threatened for a time to delay the ripening of the later grain to a point where damage from frost was likely.

For the most part, however, the weather has been clear and warm and the damage from frost, it is anticipated, will be very small. No further estimates of yields will be made until some of the actual threshing returns have been received by the department. The indications are that the yields will average up somewhat better than was anticipated earlier in the season. In the central and northern districts particularly, late rains have improved the grain to such an extent that estimates of yields are now more optimistic. The feed situation has also been considerably improved.

Fax acreage reported in the province this year is small. The acreage of oats threshed will be reduced through the fact that much of the crop has been cut for feed. Damage from hail has been slight over the province as a whole, this season. The most serious storm was that which occurred a week ago, in the territory from Wetaskiwin eastward toward Wainwright. Several farms in this territory on a strip three miles wide suffered losses estimated at from 50 to 75 per cent. of the crop.

PLACE EXTRACTS ON BANNED LIST IS ORDER

No more tincture of orange, not even of bitter orange, and no more tincture of lavender or ginger and no more beef and iron wine can be sold in the province of Alberta, an order-in-council to this effect having been put into operation recently.

Heretofore, all the formulae in the British and United States pharmacopoeia could be legally used here, but police records went to show that rather more of some of these tinctures were being used than were needed for the Saturday cooking, so the provincial analyst has been making an examination of these prescriptions, with the result that from the British pharmacopoeia, tincture of lemon, compound tincture of lemon, compound tincture of lavender, tincture of ginger, orange wine, wine of iron citrate and from the United States pharmacopoeia, tincture of bitter orange, tincture of sweet orange peel, tincture of cardamom, compound tincture of bitter almond, spirit of juniper, compound tincture of juniper and aromatic elixir. In addition beef iron and wine has also been placed on the banned list.

These cannot now be sold by drug stores or merchants throughout the province for any purpose, except as returning goods.

700 STUDENTS ENROLLED

More students than in any previous year of educational endeavour in this province will commence training for the teaching profession when the provincial normal schools of Alberta open on Aug. 29th. The number enrolled is over seven hundred.

IS IT A

?

OF WHERE TO GO

...THAT KEEPS YOU FROM
TAKING A HOLIDAY TRIP

Then let us help you to solve it by suggesting

"THE NATIONAL WAY"

TO

Pacific Coast

Canadian National

THERE is nothing that will contribute so much to the enjoyment of your trip or holiday as travelling Canadian National to Port Arthur or Duluth, thence steamers of the Northern Navigation. In connection with this summer trip east, there is the option of returning by a cool air-all route—the Canadian National route—a comfort given route and comfort given trains. East by boat. West by rail, or vice versa, or all rail in both directions.

SPECIAL SUMMER FARES NOW IN EFFECT

Through Daily Transcontinental Service

FAIREST TIME - SHORT LINE - SUPERIOR ROADBED - EXCELLENT SERVICE
THE "CONTINENTAL LINER" runs daily in either direction between Montreal and Cobham. With its unique double Coach points and complete All-Steel Compartment-Observation-Library Cars, and a delightful boat trip west, as traveling over entirely different territory in each direction. The Northern Canadian Rockies, tree-covered mountain peaks, scenes to be found on no other route, and so vast that it is always new. To make your trip complete a few days should be spent at Jasper Park Lodge.

There is a wide choice of routing and stop-over privileges, enabling you to cover new ground in both directions.

Any Agent will assist you with your trip. Route Fares, make Reservations and look after all details.
